

(a) bounds of the constant

(b) efficiency of the bound

(c) boundary share of the bound

- LapD, PINN (orange line with circles)
- LapD, Deep Ritz (blue line with circles)
- PoiD, PINN (orange dashed line with squares)
- PoiD, Deep Ritz (blue dashed line with squares)
- 16 000 iterations, $d = 10$ (black triangle up)
- Deep Ritz at the PINN's CPU time, $d = 10$ (black triangle down)

- weight sweep, $d = 5$ (16 networks) (open circles)
- open: non-confirmatory (pilot) (open circles)
- pre-registered limit 3 (for $d \geq 5$) (dotted line)
